# ABOUT US

GOLDfx

Decentralization is not a new concept. When building a technology solution, three primary network architectures are typically considered: centralized, distributed, and decentralized. While blockchain technologies often make use of decentralized networks, a blockchain application itself cannot be categorized simply as being decentralized or not. Rather, decentralization is a sliding scale and should be applied to all aspects of a blockchain application.

# What is **Forex**?

The foreign exchange market is where currencies are traded. This international market's most unique aspect is that it lacks a central marketplace. Instead, currency trading is conducted electronically over the counter (OTC). This means that all transactions occur via computer networks among traders worldwide rather than on one centralized exchange.

---

# MetaTrader 5?

MetaTrader5

A powerful platform for Forex and  
Exchange markets.

Successful trading starts with convenient and functional trading.  
MetaTrader 5 is the best choice for the modern trader.

GOLDfx

Your total payout each time is \$4,350 which you can receive from your structures, and the total you can receive, each time, is \$49,500! And these are funds that can be withdrawn from the BOT Wallet. The TRADE INCOME and the BOT INCOME will not only meet the goal of GoldFX which is to provide the means for our members to become financially free, but this will also help the company to become financially solid. We will have the means to completely close the door on the past and open the door to a bright abundant future.
